

Domestic Ventilation

Fan Accessories

Variable Speed

Fan Controller

Part No. COMTSCV

Electrical Controllers

Key Features

The Variable Speed Controller 'COMTSCV' is suitable for controlling the speed of fans providing that the electrical load is no less than 20 Watts or more than 200 Watts. Suitable for Standard 4"/100mm, 5"/100mm, 6"/150mm, 9"/230mm and 12"/300mm Fans. The Variable Speed Control allows the user to adjust the air flow rate to suit variable room occupancy and use, thereby reducing unnecessary heat loss and achieving substantial energy savings. This controller is not compatible with Timer fans.

Technical Details

0.7A

Single Phase

50Hz

220-240V

Electrical Load: 20 to 200 Watts

Extract or Supply only Control

Variable Speed Control

Single fan control only

Important: A double pole switched and fused spur must be used, having a contact separation of at least 3mm in all poles, and a fuse rated at 3A. Both the fused spur isolator and the Variable Reversible Fan Speed Control must not be accessible to any person using either the shower or the bath in accordance with the latest IEE zoning regulations.
