Selected Speed	Watts	Fan Speed (RPM)
Low	27	1222
Medium	31	1316
High	35	1368

**Speed:** Pressing once will turn the Fan on, the Fan will start on the Low Speed setting. Press the 'Speed' button again to select Medium, another press will select High Speed. One more press of the 'Speed' button will turn the Fan off.

**Soft Wind:** This function allows the fan to automatically change the speed of the fan as follows:  
Low > Medium > Stop > Low > Medium > Stop > etc.

**Timer:** Press once for 1 hour, press twice for 2 hours, press three times for 4 hours and press 4 time for 8 hours operation.

**Swing:** By pressing this button the Fan will start to oscillate.
